

Rare Cancers Awareness Day

June 2022

Communications Toolkit

About Rare Cancers Awareness Day

Each year in Australia, 52,000 people are diagnosed with rare or less common cancer; 25,000 will not survive.

The barriers and isolation experienced by these patients can be significant. It can often mean high costs and limited – and in some cases, no – support, education or treatment options due to the limited knowledge, expertise, research and investment.

Rare Cancers Awareness Day is held annually on 26 June. It's a day to support Australians affected by rare cancer and highlight the change patients need and deserve.

Join us throughout the month of June as we seek to improve understanding of rare cancers, raise awareness of the unique challenges patients face, share stories from the rare cancer community, and ultimately call for change.

This year's theme: *You are not alone*

We believe that every patient with cancer, regardless of rarity, deserves support to help cushion the freefall that a diagnosis can bring. Whether that's connecting with a Specialist Cancer Navigator for personalised support and guidance, or finding your own community of people who get it; support and connection matter in a rare experience.

By showing your support for rare, together we can remind people with rare cancer that they are not alone.

How you can help

There are several ways you – as an individual or organisation – can show your support for rare cancer patients this June. Let them know you are in their corner: **#WeAreRare**

1

Follow **@RareCancersAustralia** on Facebook & LinkedIn, and **@RareCancers** on Instagram & Twitter.

2

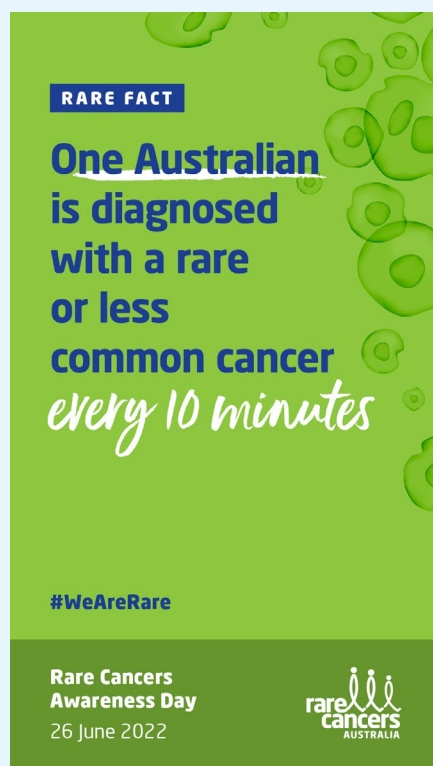

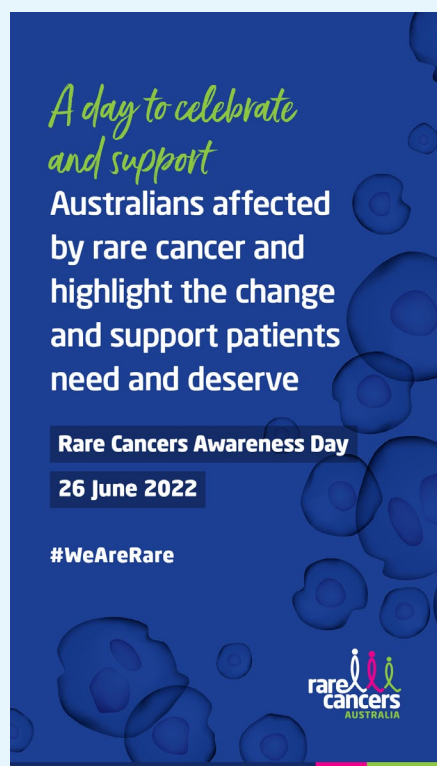

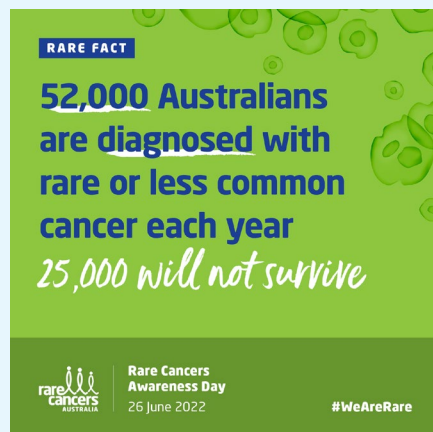

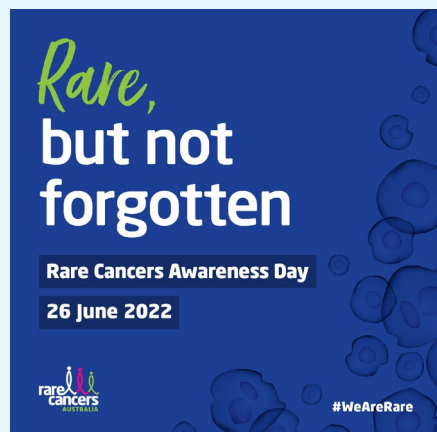

Like **#WeAreRare** posts and share a few with your friends, colleagues and family.

3

Add a customised message to these social media tiles throughout June to raise awareness of rare cancers and show your support for patients. Remember to add the hashtag **#WeAreRare** and tag RCA.

About Rare Cancers Australia

Rare Cancers Australia aims to improve the lives and health outcomes of Australians living with complex, rare and less common cancer.

We believe that no Australian should have to go through their cancer journey alone, which is why we are Australia's first charity with Specialist Cancer Navigators dedicated to the rare patient journey.

For 10 years we have provided 360-degree personalised support to patients and driven change in access, affordability, and quality of care for the patients of today and tomorrow.

This year, we are celebrating our 10th anniversary of supporting rare cancer patients.
